

The AMA History Project Presents: Biography of KENNETH KEEGAN

Written by AMA staff (04/1988); Transcribed by JS (05/2008), Reformatted by JS (10/2009)

The following was published in the April 1988 issue of Model Aviation magazine. Kenneth was a 1987 AMA Scholarship winner.

Kenneth Keegan, Burbank, CA, is at the University of California in Los Angeles. His aim is to achieve a degree in Physics, largely because of his interest in model aviation and a desire to know how the world works. Ken feels that a demanding hobby helps a person develop a mature frame of mind as well as being an aid to personal growth. Both his father and mother are active aeromodelers and have encouraged him in his efforts. A keen competitor in Free Flight events, with 10 contests (more or less) each year, Kenneth has won his share of awards.

He also found time for other pursuits while in high school. Spanish Club, Athletic Statistics, physical science experiments, and being a member of the California Scholastic Federation for there years kept him well occupied.
