## AMA/Charles H. Grant Scholarship Program

The amount and number of scholarships to be presented for the current year will depend, to a large extent, upon the number of applicants and their qualifications. Approximately \$40,000 is available, in endowments and scholarships, to be distributed in various amounts on the basis of AMA modeling activities, scholastic achievement, and citizenship achievement. All applications will be considered and evaluated by the AMA Scholarship Committee, which will then make a recommendation to the Executive Council (AMAs Board of Directors).

In choosing the recipients for the AMA/Charles H. Grant Scholarship Program, many aspects are taken into consideration. The most desirable applicant is one who is academically superior and is also a participant in many aspects of school, modeling, and the community. The applicants are rated in several major categories, including grade average and test results. High achievement in all of the categories is important for the maximum amount of scholarship to be awarded to an individual. However, a person who is not right at the top of his/her class may win a significant scholarship award if he/she is active in the community, in aeromodeling, or both. All facets are taken into consideration, and a well-rounded person may well be more qualified than one who excels only in school grades or in modeling, but scholarship awards are available separately for any of the three bases for qualification.

To be eligible for a scholarship, the applicant must:

- (1) Have been an AMA member for the last full 36 consecutive months prior to the April 30 application deadline.\*
- (2) Graduate from high school in the year in which the award is to be granted.
- (3) Have been accepted by a college or university offering a certificate or degree program. Applicants are eligible to receive a grant only once.
- (4) Complete pages 1-5, & 8, and not exceed the space provided on any page (unless otherwise noted).

The Charles H. Grant Scholarship Program contains other grants, which look at additional specific factors to determine the award. One was started in 1988 by the Toledo Weak Signals and is awarded to the top recipient of the AMA/Charles H. Grant Scholarship. Another-the Telford Scholarship-is based on participation in competition activity in the AMA and FAI classifications listed on page 8.

All of the programs use the information supplied on the AMA/Charles H. Grant Scholarship application to determine the winners.

Mail completed forms to:

Academy of Model Aeronautics  
Education Department  
5161 E. Memorial Dr.  
Muncie IN 47302

**\*Membership ends each year on December 31, regardless of the date a membership application is received.** All membership benefits begin on the day of receipt at AMA Headquarters of a properly completed application and correct dues payment.

**Application for AMA Scholarships**  
**Deadline: April 30**

Print or type clearly in black ink!!! All information must be supplied for your application to be considered. All documentation should be on 8½ x 11 paper.

TO THE APPLICANT: Please complete all other sections of this application. Then have the designated authority in your high school complete this section of the application, attach an official transcript, and mail to:

Academy of Model Aeronautics  
Education Department  
5161 E. Memorial Dr.  
Muncie IN 47302

TO THE SCHOOL OFFICIAL: The Academy of Model Aeronautics appreciates your cooperation in completing this form. Your comments are available only to the Scholarship Committee. Please complete **all** sections of the form, even if any or all of the information appears on the transcript.

1. Please attach an official copy of the applicants transcript to this application.
2. Please complete the structured evaluation section below.
3. Please write unstructured comments and sign the form on the next page.

A. Applicants cumulative GPA \_\_\_\_\_ Highest possible GPA \_\_\_\_\_  
(Highest possible GPA is the GPA that would be achieved if a student earned the maximum possible grade in every class taken. Honors or weighted scales must be considered in calculating the absolute maximum score possible. A student's GPA cannot exceed the highest possible GPA. Only if the student earns the maximum points possible in every class should the student's GPA equal the highest possible GPA.)

B. Latest test information:
