## Members encouraged to comment on FAA's sUAS NPRM

On February 23, 2015, the FAA published its proposed regulations for small unmanned aircraft systems (sUAS) as a notice of proposed rulemaking (NPRM). AMA has created a suggested template for comments, which we strongly encourage you to edit and personalize. Unless extended, the deadline for submitting comments is 11:59 p.m., Friday, April 24, 2015. Click below to use our template to comment.

## National Model Aviation Day T-shirts now on sale

Preorder your National Model Aviation Day T-shirt to show your support for the third annual National Model Aviation Day. This year's shirts feature the National Model Aviation Day logo, and the phrase "beautiful spacious skies for amber waves of planes." The shirts are available without the date, and without this year's charity, the Wounded Warrior Project, and can be purchased in sizes S-4XL. If your club is interested in purchasing shirts with your club's logo, they are available for an additional \$10 each. Thank you to our newest Platinum Sponsor, [Hobbico](#), for supporting National Model Aviation Day along with [Ready Made RC](#) and [HobbyKing](#). Platinum Sponsors' names will be included on the back of the shirts. Only one Platinum Sponsorship is still available. See our [National Model Aviation Day sponsorship page](#) to learn more.

## Learn more about the scaled aircraft lab at NASA's Armstrong Flight Research Center

Check out this video that uncovers the workings, tools, and rationale of the aircraft lab at NASA's Armstrong Flight Research Center on Edwards Air Force Base. Watch commercial off-the-shelf aircraft, one-of-a-kind designs, powered aircraft, and gliders takeoff, fly, and land. AMA's Jerry Budd and the chief pilot and designer of the lab, Red Jenson, explain how and why the researchers do what they do. Red is an AMA Life Member and Jet Turbine waiver holder and has been a stage speaker at the AMA Expo. [View the video of the presentation at AMA Expo 2015](#) flight testing the towed air glider launch concept using a subscale research model.
