
Biography of JAMES E. KIRKLAND

1924 - 1972

Written & Submitted by REV (3/74)

Transcribed by NR (12/99)

Edited by SS (2002), updated JS (09/07)

Career:

- A prolific contest winner
- Author of many articles in the major model magazines
- Had numerous kit of his designs in production with a number of manufacturers
- A member of the AMA advisory board
- A member of the Radio Controlled (RC) contest board
- 1968-69 Vice President of District V

Honors:

- 1975 – Model Aviation Hall of Fame
-

The following biography was taken from a Model Aviation Hall of Fame application. Ronald E. Van Putte submitted the application was on March 17, 1974.

Subject: Nomination to the Model Aviation Hall of Fame for James E. Kirkland

Gentlemen:

The Eglin Aero Modelers hereby nominate the late James E. Kirkland for consideration to the Hall of Fame. (The appropriate AMA Form is attached.)

His contributions during 36 years in the field of model aeronautics staggers the imagination. Please note on the completed AMA Form that Jim excelled in each of the categories referenced. Also, please note in the addenda to the supporting remarks the tributes paid Jim at the time of his passing by prominent individuals in the field of model aeronautics. He was also well known in other parts of the world and, if time would permit, similar editorials could be obtained. Among the contributors to Jim's memory are our dynamic, hard-working President, John Clemens and the boy wonder from Tallahassee, Rhett Miller, last year's national champion who was a prodigy of Jim's (see attached form for their thoughts).

It is felt that the heritage left by Jim Kirkland will continue to influence model aeronautics for some time to come; therefore, it is considered fitting that his name be placed in the Model Aviation Hall of Fame as a final tribute to his memory. Your attention to this matter and your reply will be appreciated.

*Very truly yours,
David O. Fraser
President
Eglin Aero Modelers*

Entered Contests

Time will not allow a thorough check of all contest results. The following information is taken from trophies.

Location	Date	Result
Masters RC Tournament, Marietta, Ga.	1969	Second
Detroit (Mich.) Invitational	1964	First
Detroit (Mich.) Invitational	1965	First
C.C.R.C.C.	1970	Third (CL D Expert)

Designs Used by Others to Win Contests

The Beachcomber, Citron, Triton, and Intruder are designs known to have been used by others to win contests. Time will not permit gathering precise information of how many of his designs have won or the date of the win. Top flyers Rod Chidgey, Don Coleman, Rhett Miller and others have flown his designs in contests. It is believed all of his designs, except the Talon, have been used by others. His Intruder was used by Rhett Miller to win second place in the 1972 Nationals Class A Pattern.

Experimenter

Jim was well known throughout the model aviation world as an experimenter, designer, and

innovator. His airplane designs set standards for competitive aircraft configurations of today. His contributions in electronics set the stage for the modern RC system; in fact, he was the first to win the nationals with a proportional system. His final and greatest contribution was the Funline radio system, which was ready for a team to commence production when he was struck down with a heart attack on Nov. 4, 1972. Due to space limitations all his contributions cannot be listed here; however, some of the major innovations are shown under INDUSTRY Attachment 9.

*Eglin Aero-Modelers
C/o Mr. Bill Grigsby
224 Hudson Drive
Ft. Walton, Florida 32548*

Dear Bill,

I would like to take this opportunity to congratulate the Eglin Aero-Modelers upon their plans to nominate Jim Kirkland for inclusion in the Model Aviation Hall of Fame.

Having been closely associated with Jim for 10 years in RC circles, I can think of no one in the South more deserving of this honor. His contributions to the whole port were those of a fine competitor, gentleman, sportsman, and true professional in all senses of the words.

I certainly wish you and your club complete success in this endeavor.

*Sincerely,
Don Coleman, 23214

*Reply to ATTN Of: 73CCR
Subject: Letter of Commendation*

*To: Air Proving Ground Center
Eglin Air Force Base, Florida*

- 1. I wish to commend a member of your command, Master Sergeant James E. Kirkland, 2303 Test Group, for his participation in the USAF 1963 World-Wide Fighter Interceptor Weapons Meet at Tyndall Air Force Base, Florida.*
- 2. Sergeant Kirkland contributed significantly to the success of the Air Show and Open House, which were climaxed William Tell 1963, with an outstanding aerial demonstration of his Radio Controlled model aircraft. The complexity and variety of aerobatic maneuvers in this exciting performance was one of the highlights of the Air Show and approximately 30,000 people in attendance gained a new insight into a traditionally fascinating hobby. The professional competence that he had achieved in pursuit of his avocation and his willingness to participate voluntarily in military events, reflect great credit upon himself, his organization, and the United States Air Force.*
- 3. Please express my personal appreciation to Master Sergeant Kirkland for his outstanding performance.*

*R. W. Burns

*Mr. Frank Prestwood
C/o Mr. Ron Van Putte
12 Long Wood Drive
Shalimar, Fla. 32579*

Dear Mr. Prestwood:

I was very pleased to see that the Eglin Aero Modelers have decided to nominate Mr. Jim Kirkland for the Model Aviation Hall of Fame. In my opinion, there could be no one more deserving of such an honor.

Not only did Mr. Kirkland devote his time to serving in various capacities in the AMA, but was also an active participant in AMA clubs throughout the fifth district.

It is a well-known fact that Mr. Kirkland literally dedicated his life to the development and research as it affected or related to model airplanes. This is evidenced by the fact of that most all of today's pattern airplanes can be traced to one of Mr. Kirkland's original designs.

From a personal standpoint, I shall always be indebted to him for his untiring efforts to assist me to fly the aerobatic patterns properly. In view of his unquestioned dedication to the hobby, there is no doubt in my mind that he is more than deserving of this honor.

*Sincerely,
Rhett A. Miller III*

*Chief of Naval Air Training
U.S. Naval Air Station
Pensacola, Florida 32508*

August 14, 1964

*Mr. Jim Kirkland
344 Edge Avenue
Valparaiso, Florida*

My dear Mr. Kirkland:

I wish to express my appreciation to you as a member of the 1964 National Model Airplane Meet Winners guest cruise, for visiting the Naval Air Training Command. The fact that you have taken valuable time away from your business to gain a better understanding of Naval Aviation is indicative of your patriotic interest in the welfare of your country.

May this day aboard the USS Lexington serve as a reminder that this Command continually strives to develop not only the finest aviators in the world, but officers of staunch character who will man our fighting ships in the best traditions of the United States Navy.

It was a pleasure and honor to have you aboard.

*Sincerely,
A.S. Heyward, Jr.
Vice Admiral, U.S. Navy
Chief of Naval Air Training*

The following is taken from a monthly AMA mailing from November 1972 and was written by AMA President Johnny Clemens in his report to the membership.

We Bid Good-Bye to Champion

When I arrived in Huntsville, Alabama for the RC Masters Tournament, Jim Kirkland, a smiling faced old friend of mine from the Deep South was one of the first people to greet me. Jim's greeting was, "Well, Johnny, how does it feel to be here in 'God's Country?'" Truly, everything that happened in Huntsville at the Masters was so impressive that, in writing about it in our AMA magazine section under "The President's Memo," I mentioned Jim's remark about "God's Country."

What a shock it was just a few weeks later to learn that Jim Kirkland had died of a heart attack! For those who had known Jim, no description of mine could add anything to the fine guy we knew he was. For those not personally acquainted with him, he was everything that you would like to see in an AMA champion. Skilled enough to have been a winner and champion at national and international level and to have been one of our fine technical innovators, Jim always had time to grin and chat a minute with anyone who wanted to bend his ear. And now, recalling again Jim's lasting remark to me about being in "God's Country," I am proud to have been among Jim's friends, and sad as he leaves to carry our AMA spirit and love into what is truly God's Country.
