CD/EM INSTRUCTIONS

ON PILOT REQUIREMENTS AND REQUIRED SIGNATURE ON AMA DOCUMENTS

The AMA Sanctioned Event Flight Safety Declaration

Each pilot must sign this document. The document will be returned to AMA HQ as part of the CD/EM report. Make sure the pilots review the Flight Safety Declaration page included. It should be on a clipboard by itself, and be read by the pilots while in line registering for the event. Once they review it, their signature on the Event Participation list certifies that they agree to be compliant with all AMA rules and safety protocols.

Gas Turbine Powered Airplanes or Helicopters:

Flying a turbine powered model requires the pilot to have an AMA Gas Turbine Waiver for either fixed-wing, rotary-wing, or control line. This credential will be printed on his/her current AMA membership card, and can also be verified on the AMA website. To verify, you must log into the website at www.modelaircraft.org and put your mouse over the heading MEDIA & RESOURCES. A blue box will open. Look for MEMBERS ONLY DOCUMENTS, and click on it. Select document 510-M – AMA Gas Turbine Waiver Holders. This will provide you with

a current listing of ALL Turbine Waiver Holders so you can verify that the member has this credential.

Large Model Airplane Program:

AMA has a program to allow the flight of model airplanes weighing from 55lbs. up to 125lbs. You can find details of this program on the AMA website, also under the heading MEDIA & RESOURCES. Click on AMA DOCUMENTS and select Large Model Airplane Program. The owner certifies his/her *specific* airplane and must show the *Permit to Fly* to the CD or EM prior to any flights of a LMA. The owner must have a *Permit to Fly* for each LMA airplane he or she (or the designated pilot) flies.

If you have suspicions that an aircraft at your event might be over 55 lbs., it is your responsibility to engage with the owner of that aircraft and discuss the details of their model prior to any flights.
