The Toledo Show: R/C Model Expo is likely the largest and longest-running RC model expo in North America. Join us as we take you around the show floor to see some of the highlights, the great people, and the fantastic products that make this the "granddaddy" of all aeromodeling shows!

New Technology: Kline-Fogleman Airfoil Design

Most modelers are familiar with the basic curved top and flat bottom of a traditional airfoil, but what if there was a better design? Read more to take a closer look at a novel, and possibly revolutionary, wing design.

Product review

Hacker-Model HotWing Mini 500

This EPP-foam flying wing aircraft gives you a durable flying platform in a small package!

For members

AMA Scholarship Program

AMA celebrated a huge milestone in 2016 when it reached $1 million in total scholarship money awarded. In honor of this achievement, Model Aviation is highlighting some of the recipients of these funds.

How-to

Hinging for IMAC and 3-D

This article walks you through a method that will set you up for a great-looking hinge line and will allow you to do a terrific finishing job on the gap-sealing process.
