LiPo Battery Basics

LiPo (Lithium-Polymer) batteries are a popular means for powering our electric models. As is the case when working with any power source, there are a few things that modelers need to know to stay safe and keep their batteries performing.

A look back at NEFI 2016

The 2017 National Electric Fly-In will be held June 16-18 in Muncie, IN. As you prepare for this year's event, take a look back at last year.

How-to

Draw Your View

Sometimes the inspiration to construct a model of a full-scale airplane is so original that no drawing of any kind exists. If you want to take on such a project, there's a way you can be sure to start off on the right foot.
