Learning about RC Combat

The basics of RC Combat are that you pull a 30-foot streamer in the air and get points for cutting other pilots’ streamers, as well as for keeping your own intact. You also get points based on getting up into the air on time and surviving the round of Combat.

Technical

Make your own servo extensions

If you know how to make your own servo extensions, you can keep your wiring tidy with the exact length you need. Plus, you can easily replace a connector if one becomes damaged.

Changes underway at AMA’s website

At AMA, we know our online presence is an important resource for you and for the growth of the model aviation hobby. Recently, we’ve been working behind the scenes to retool and reinvent our online experience. We are excited to announce that we have a new website at modelaircraft.org! New features will be released over the next several weeks and months, and we can’t wait to see you online.

Dawn Patrol Rendezvous

October 1-2, 2016, marked the 10th gathering of the Dawn Patrol Rendezvous, which celebrates the early years of aviation. This year’s event will be held September 22-23, 2018.

New products

Freewing F-105 Thunderchief 64mm EDF Jet

Pilots with limited hobby budgets will not only enjoy the roughly $100 price tag of the model, but also the fact that completing it can be done using inexpensive components. Those who use Spektrum radio gear will be able to use a low-priced Spektrum AR400 four-channel receiver.
